

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Reporting Requirements Not Met for Pickles Restaurant

Your water system violated [several] drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2023, we did not report our Nitrates within the allotted timeframe.

What should I do?

There is nothing you need to do at this time.

The table below list the contaminant we did not properly report for during the last year, how often we are supposed to sample for this contaminant and how many samples we are supposed to take, when the data was due to be reported, and the date on which samples were reported.

Contaminant	Required Sampling	Number of Samples	Date Report was Due	Date Report was Submitted
Nitrates	Annual	1	Jan 10, 2024	5/1/5/2024

What happened? What is being done?

We did not have the correct date on our calendar for the sampling dates. We have since taken the samples and they have come back within compliance with EPA standards. We have also updated the correct dates for these to be done so that this will not occur in the future.

For more information, please contact Robert Passage 906 248 5524, rjpassage@baymills.org

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Bay Mills Utility Authority. State Water System ID#: 050593108.
Date distributed: 11/19/2025
